ART:0091-I

The spring door closer ART. 91I is provided to close doors by internal regulating spring in 2 size following the dimensions reported in our catalogue page.

The articulated arm, sliding on the rolling small support operate to close the door .

The regulation of the strength of the spring is effected through the tension bar and pin same as operated for double or single acting spring hinges.

Materials:

- Stamped Stainless Steel.
 - Spring in special hardened Stainless Steel.
- Supplied with tension bar, pin and rolling support.

We suggest a normal, scheduled inspections and maintenance, cleaning and lubrication. In the event of faults and deterioration it is strongly recommended to replace any worn parts. All the features listed and load capacities are referred to products properly installed by qualified staff and undergo regular and periodic maintenance, in relation to the use, placement and environmental conditions.

DECLARATION OF CONFORMITY

The company I.B.F.M. LTD hereby declares that the above listed products are manufactured in Italy in accordance with current standards.
