Door and window holder ART. 260-261

Door holder operating on the door (art. 261) or at the bottom part of the door (art. 260). This product automatically holds the door in the open position.

In order to release the door leaf it is enough to pull the door itself.

Two models:

- art. 260 with staple to be fitted in the floor
- art. 261 with staple to be screwed on the door or wall surface

Materials:

- Body in zinc-alloy
- Spring in special hardened steel C72
- Staple in zinc-alloy

Finishings: as per our catalogue

We suggest a normal scheduled inspection and maintenance, cleaning and lubrication. In case of malfunction or deterioration we are strongly recommended the replacement of all or at least parts of the bearings. All the features listed and the load capacity are reported to products correctly

installed by a qualified and undergo regular and periodic maintenance and lubrication, in connection with the use, placement and environmental conditions.

DECLARATION OF CONFORMITY The company I.B.F.M. LTD hereby declares that the above listed products are manufactured in Italy in accordance with current standards.
